

Homework 5

- 1) ask the user for a whole number. Tell him whether it is even or odd using an if else statement.
- 2) ask the user for a whole number. Tell him whether it is positive (≥ 0) or negative using an if else statement.
- 3) ask the user for two whole numbers. Tell him if the 1'st is a multiple of the second or not using an if else statement.

Please upload your code in a file with your name and class Id in the name of the file.
